INTRODUCTION

The STATISTICS OF OHIO LIBRARIES is compiled from information supplied by academic, institution, public, and special libraries, and school library media centers in Ohio through questionnaires sent by The State Library of Ohio during 1981.

The publication includes data from all types of libraries as well as Rankings of public and academic libraries.

The public library statistics are reported for calendar year 1981. County auditors' offices reported data on the distribution of intangibles tax funds to the Auditor of State. This data was forwarded to the State Library where it was compared with the information received from the public libraries.

Academic, Special and Institution library data are based on information from the annual reports with statistics for the most recently completed fiscal year.

Statistics on school library media centers (for school year 1980-1981) were collected by the Ohio State Department of Education's Ohio Educational Data Systems School Building Survey (OCCD-7L). These statistics were compiled by the Department of Education's Division of Computer Services and Statistical Reports and forwarded to the State Library. This year, for the first time, school library statistics are reported by school districts.

Arrangement of information is generally self-explanatory; footnotes have been used as needed. A dot leader (...) or an N/R in a data column indicates a non-response.

Data were handled both at The State Library and at the State Data Center. Academic, institution, public, and special library statistical reports were edited at The State Library and sent to the State Data Center for data entry. Printouts were checked for accuracy at The State Library and preliminary printouts of academic and public library data were sent to librarians for verification prior to printing.

Notes of omissions and errors are invited. Thanks are expressed to librarians, clerk-treasurers, auditors, school superintendents and others who have supplied data for the STATISTICS OF OHIO LIBRARIES.

*There is an area of inter-relationship between these two taxes. In the case of bank deposits, one class of intangible property, if the individual declares the tax and pays it, the money goes into the county intangible fund and libraries along with other sub-divisions may share in it. However, if the bank declares the tax and pays it, which is the usual procedure, the money is collected by the state, goes into the local government fund, and is not available to libraries.

(1) Figure used is total collection before deductions (auditor's and treasurer's fees, State of Ohio fees).
(2) Figure used is total available for library distribution after state and local fees are paid.
(3) Includes any tax levied on real property specifically for current operation or appropriated for that purpose.
(4) In computing the percentages of intangible taxes distributed to libraries, the figures under "Intangible Tax Distribution to Libraries" are used. All percentages are rounded to the nearest full percent.
(5) In computing the per capita intangible tax income of libraries the figures under "Intangible Tax Distribution to Libraries" are divided by the county population.

INTRODUCTION

The STATISTICS OF OHIO LIBRARIES is compiled from information supplied by academic, institution, public, and special libraries in Ohio through questionnaires sent by The State Library of Ohio during 1982.

The publication includes data from all types of libraries as well as Rankings of public and academic libraries.

The public library statistics are reported for calendar year 1982. County auditors' offices reported data on the distribution of intangibles tax funds to the Auditor of State. This data was forwarded to the State Library where it was compared with the information received from the public libraries.

Academic, Special and Institution library data are based on information from the annual reports with statistics for the most recently completed fiscal year.

Statistics on school library media centers (for school year 1981-1982) were collected by the Ohio State Department of Education's Ohio Educational Data Systems School Building Survey (OCCD-7L). These statistics were compiled by the Department of Education's Division of Computer Services and Statistical Reports and forwarded to the State Library.

Arrangement of information is generally self-explanatory; footnotes have been used as needed. A dot leader (. . .) or an N/R in a data column indicates a non-response.

Data were handled both at The State Library and at the State Data Center. Academic, institution, public, and special library statistical reports were edited at The State Library and sent to the State Data Center for data entry. Printouts were checked for accuracy at The State Library and preliminary printouts of academic and public library data were sent to librarians for verification prior to printing.

Note of omissions and errors are invited. Thanks are expressed to librarians, clerk-treasurers, auditors, school superintendents and others who have supplied data for the STATISTICS OF OHIO LIBRARIES.

*There is an area of inter-relationship between these two taxes. In the case of bank deposits, one class of intangible property, if the individual declares the tax and pays it, the money goes into the county intangible fund and libraries along with other sub-divisions may share in it. However, if the bank declares the tax and pays it, which is the usual procedure, the money is collected by the state, goes into the local government fund, and is not available to libraries.

(1) Figure used is total collection before deductions (auditor's and treasurer's fees, State of Ohio fees).
(2) Figure used is total available for library distribution after state and local fees are paid.
(3) Includes any tax levied on real property specifically for current operation or appropriated for that purpose.
(4) In computing the percentages of intangible taxes distributed to libraries, the figures under "Intangible Tax Distribution to Libraries" are used. All percentages are rounded to the nearest full percent.
(5) In computing the per capita intangible tax income of libraries the figures under "Intangible Tax Distribution to Libraries" are divided by the county population.
